Sudhansu Sekhar Panda

Production Support Engineer | L2 Application Support | Incident and Problem Management | Unix | SQL | AWS

Bangalore, India | +91 90756 52474 | sudhansu.ne@gmail.com | linkedin.com/in/sudhansu-sekhar-b18805195 | sudhansupanda8860.github.io | github.com/sudhansupanda8860

PROFESSIONAL SUMMARY

Production Support Engineer with 11+ years of L2 / Tier 2 application and infrastructure support for capital markets trading, banking fraud management, telecom billing and security analytics platforms. Currently supporting trading applications (Swap, Credit, NewMarket, Forex) at Goldman Sachs in a 16x5 model with on-call cover. Day to day I work in Unix and SQL, watch systems through AWS CloudWatch, Grafana and Autosys, and run incidents through ServiceNow, BMC Remedy and JIRA within SLA. Strong at root cause analysis, calm and clear communication during P1 and P2 outages, and writing SOPs that let L1 teams fix repeat issues on their own.

CORE COMPETENCIES

Production Support (L2 / Tier 2) | Application Support | Incident Management | Problem Management | Root Cause Analysis (RCA) | Change Management (CR / RFC) | SLA Management | Escalation Management | Monitoring and Alerting | Batch Job Monitoring | Post Implementation Review (PIR) | UAT and Hotfix Validation | SOP and Knowledge Base | Shift-Left Enablement | 24x7 and On-Call Support | Stakeholder Communication

TECHNICAL SKILLS

Operating Systems: Unix / Linux (multiple flavours), Windows

Tools and Access: Unix Shell Commands, Log Analysis, PuTTY, Health Checks

Database: SQL, Oracle SQL Developer

Cloud and Monitoring: Amazon Web Services (AWS), AWS CloudWatch, Grafana, Application Dashboards

Job Scheduling: Autosys job monitoring (GUI)

ITSM and Ticketing: ServiceNow, BMC Remedy, JIRA

ITIL Practices: Incident, Problem, Change and Service Request Management

Reporting: KPI Reports, MIS Reports, Incident Trackers, Weekly and Monthly Status Reports

Domains: Capital Markets Trading (Swap, Credit, NewMarket, Forex), Banking and Fintech Fraud Management (FMS), Telecom Billing (EBPP), Security Analytics (SIEM)

PROFESSIONAL EXPERIENCE

System Integration Engineer (Production Support) — **Jul 2022 - Present**

Goldman Sachs | *Capital Markets Trading Support* — *Bangalore, India*

- Provide 16x5 Tier 2 production support for trading applications (Swap, Credit, NewMarket, Forex) and the infrastructure behind them, and cover shift and on-call rotations for site and system outages.
- Diagnose and fix complex production issues, reproduce user problems, and raise well documented bug tickets for engineering when a code fix is needed.
- Write RCA documents and take part in Post Implementation Reviews and Problem Management to stop the same incidents from coming back.
- Prioritise and work the support queue within department SLAs, escalating early when an issue needs another team.
- Work with Development, QA and Operations teams to improve systems, processes and day-to-day operations.
- Write SOPs, runbooks and KB articles with a shift-left focus so the L1 team can triage and resolve repeat incidents on their own.

Cloud Support Engineer — **Dec 2021 - Jun 2022**

Securonix India Pvt. Ltd. | *Snypr Security Analytics Platform* — *Bangalore, India*

- Delivered 24x7 Tier 2 production support for the Securonix Snypr application and its cloud infrastructure, including shift and on-call cover for outages.
- Worked directly with customers on P1 and P2 incidents and kept them updated until service was restored.
- Diagnosed and reproduced complex issues, raised bug tickets and escalated to engineering with full supporting detail.
- Wrote RCA documents, contributed to Post Implementation Review and Problem Management, and closed tickets within SLA.

Senior Support Engineer — **Dec 2019 - Dec 2021**

CustomerXPs Software Pvt. Ltd. | *Banking Fraud Management System* — *Bangalore, India*

- Resolved production issues for banking Fraud Management System (FMS) deployments and delivered permanent fixes backed by root cause analysis.

- Handled post-release issues after Change Request (CR) and Production Fix (PF) rollouts with quick turnaround, which improved the Customer Satisfaction Index (CSI).
- Validated hotfixes in UAT and deployed them to production after client approval.
- Ran daily and weekly client calls, prepared weekly and monthly status reports, and fixed recurring issues found through Service Request (SR) RCA.

Senior Software Engineer **Feb 2018 - Nov 2019**
Netcracker Technology | *Telecom Application Support* *Hyderabad, India*

- Provided server-side and application support in a 24x7 environment, working hands-on across multiple Unix flavours.
- Ran daily application health checks, monitored system performance, and dispatched and resolved customer tickets within SLA in JIRA.

Operations Associate **Apr 2015 - Feb 2018**
AurionPro Solutions Pvt. Ltd. | *EBPP Telecom Billing* *Pune, India*

- Delivered 24x7 L2 application and production support for the EBPP (Electronic Bill Presentment and Payment) application, covering daily operations, troubleshooting, RFCs and escalations.
- Ran live bill runs and pre- and post-billing activities for Vodafone PAN India circles, resolving issues during each cycle.
- Owned Critical, Major, Medium and Low priority incident and problem tickets through to resolution within SLA.
- Built KPI reports, daily, weekly and monthly delivery reports, incident trackers, application dashboards and MIS documentation.
